

SYSTEM AND METHOD FOR MANAGEMENT  
OF TRANSCRIBED DOCUMENTS

ABSTRACT OF THE DISCLOSURE

A system and method for management of transcribed documents is disclosed. In the preferred embodiment, the system comprises a central file system for storing a plurality of documents, each of the plurality of documents being stored in only one of at least two folders in the central file system based at least in part on a respective status of the plurality of documents. The system also comprises a content indexing module operable to index each of the plurality of documents stored in the central file system based at least in part on the respective content of the plurality of documents stored in the central file system. The system further comprises a document management module operable to manage the processing and distribution of the plurality of documents stored in the central file system in response to, at least in part, the respective status of the plurality of documents.
